Japan Coast Guard expands Super Puma fleet with additional H225 order

Atlanta, 6 March 2019 – Japan’s largest Super Puma operator, Japan Coast Guard (JCG), has acquired an additional H225. With the new helicopter, JCG’s Super Puma fleet will include two AS332s and 11 H225s, for security enforcement, territorial coastal activities, and disaster relief missions in Japan.

“We are delighted at how our Super Puma helicopters have continued to remain relevant and responsive to the Coast Guard’s operational needs. The fact that JCG’s latest H225 participated in a series of rescue missions immediately upon delivery and rescued 23 people, speaks volume of our aircraft’s mission-ready performance and availability. This follow-on order also re-affirms the confidence that JCG has in our helicopters. We are certain that the expanded fleet will continue to meet JCG’s exacting requirements. Airbus remains committed to ensuring the fleet’s high availability for all missions,” said Guillaume Leprince, Managing Director of Airbus Helicopters in Japan.

The 11-ton-category, twin-turbine H225 is the latest member of Airbus Helicopters’ Super Puma family. It is well regarded as a reference in search and rescue operations and relied on by organisations globally including the Spanish Guard, the Argentine Coast Guard, and the South Korea’s National 119 Rescue Headquarters. Equipped with state-of-the-art electronic instruments and renowned autopilot precision, the all-weather capable H225 offers outstanding endurance and fast cruise speed, and can be fitted with various equipment to suit any role.

In Japan alone, a total of 25 helicopters from the Super Puma family are currently flown by civil, parapublic operators, and Japan’s Ministry of Defense for various search and rescue missions, offshore operations, VIP, fire-fighting, and passenger and goods transportation.

About Airbus

Airbus is a global leader in aeronautics, space and related services. In 2018, it generated revenues of €64 billion and employed a workforce of around 134,000. Airbus offers the most comprehensive range of passenger airliners. Airbus is also a European leader providing tanker, combat, transport and mission aircraft, as well as one of the world’s leading space companies. In helicopters, Airbus provides the most efficient civil and military rotorcraft solutions worldwide.
